PROJECT REENERGIZE

**The federal stimulus program is coming to your home
Don't miss out on FREE MONEY!**

Project ReEnergize is an energy efficiency rebate program, designed to improve your home, save you energy and money, and create jobs in the Minnesota economy. To participate in the program and receive a rebate check, you must work with a Project ReEnergize trained and qualified contractor.

Act now, the rebate pool is limited and once it's gone, it's gone. Whether you have a remodeling project in mind or you'd like to save money on energy costs don't delay. Call a Project qualified contractor near you today.

The Program

This program distributes homeowner rebates, mailed directly to the homeowner, for energy efficient home upgrades.

The maximum rebate available per house for energy efficient upgrades without attic air sealing is \$2,500.

The maximum rebate available per house for energy efficiency upgrades with attic air sealing is \$4,000. An additional \$750 is available for replacing orphaned atmospherically vented water heaters (available only with attic air sealing.)

| Energy Efficiency Measures Eligible For Rebate | Maximum Rebate per Household |
|--|-------------------------------------|
| Replacement Energy Star window without attic air sealing | \$250 per window |
| Replacement Energy Star window with attic air sealing | \$300 per window |
| Advanced air sealing of attic | \$800 |
| Attic insulation | \$800 |
| Exterior wall insulation | \$800 |
| Replacing orphaned atmospherically vented water heater | \$750 |

Heating systems are not eligible for rebates as was previously publicized. Talk to a Project ReEnergize Qualified Contractor to see if you qualify for utility rebates or the \$1,500 federal tax credit available for high efficiency furnace and boilers.

Program Requirements

- Home must be owner-occupied and constructed prior to the year 2000.
- Must work with a Project ReEnergize qualified contractor, licensed by the state of Minnesota.
- Only contracts signed after October 1, 2009 are eligible for rebates. The contract must be for a new remodeling project. Change orders for contracts signed before October 1, 2009 are not eligible for rebates.
- Rebate eligible energy efficient projects must be completed before rebate application can be submitted.

| | |
|--------------------------------------|---|
| Age of Housing | Constructed prior to 2000. |
| Square Footage | 3,000 square feet or less; not including basements, garages or crawlspaces. |
| Ownership | Homeowner with permission to alter building shell; owner occupied primary residence. This does not include condominiums, mobile homes and second residences. |
| Income Limits | There are no household income limits. Only properties meeting the square footage limit are eligible for rebates. |
| Do-It-Yourself Work | Property owners must hire qualified contractors to earn a rebate. The contractor must pull all required building permits. Do it yourself work or work by unlicensed contractors will not earn rebates. |
| Rebate Distribution | Only one rebate check per household. |
| Geographical Location | Rebates will be geographically distributed into 3 - 5 zones by % of state population base. Zones will be determined by OES. |
| Limitations On Other Programs | This program has no limitations on other incentives that property owners may receive including the \$1,500 federal tax credit; utility rebates; and other incentives. Determining compliance and applying for other incentives outside this program is the property owner's responsibility. |

The Builders Association of Minnesota (BAM) is administering Project ReEnergize on behalf of the Minnesota Department of Commerce. BAM is a statewide trade association representing over 3,500 members involved in home building, remodeling, multifamily construction and other aspects of the residential and light commercial construction industry.

This project was made possible by a grant from the U.S. Department of Energy and the Minnesota Department of Commerce.

Please be aware that the opportunity to receive any rebate money from Project ReEnergize (the "Program") is contingent on the approval of a Rebate Application, submitted by the homeowner, in BAM's sole discretion, the completion of upgrades in accordance with the requirements of Project ReEnergize, and the availability of rebate funds at the time the Application is processed. Funds shall be distributed on a first come, first serve basis and Builders Association of Minnesota ("BAM") makes no representation or guaranty as to the availability of funds at any particular time or for any particular project.

Those interested in participating in the Program should review and be aware of Project ReEnergize's terms at the time of application. Strict compliance with all terms and guidelines of Project ReEnergize is required to be eligible to receive any funds through the Program.

Only Project ReEnergize qualified contractors who have completed the required Program training will be eligible to perform rebate work. BAM and all applicable government agencies expressly disclaim any representations or warranties, whether express or implied, with regard to the habitability, merchantability, or fitness for a particular purpose of any eligible improvements made under the Program. Homeowners shall look solely to their Contractors with regard to any warranty claims. BAM and any applicable governmental agency shall not be responsible for any mitigation responsibility, claims or damages arising from the work performed, including defect or warranty claims related to increased humidity levels in the home caused by air sealing.
